A woman with blonde hair tied back is performing a yoga pose on a black mat. She is wearing a black short-sleeved crop top and teal leggings. Her right arm is extended upwards, and her left arm is resting on her right knee. Her right leg is bent at the knee, and her left leg is extended straight out to the side. The background features a modern interior with a concrete pillar on the left and a staircase with black metal railings on the right. The overall aesthetic is clean and industrial.

About AIREX®

AIREX® is the world market leader in the field of training and therapy mats. In the early 1960s AIREX® was the first brand to manufacture foam mats, and to undertake the requisite pioneering extrusion works in the mid-1980s.

AIREX® products are present in over 50 countries through distribution partners, and exported to another 120 countries all over the world as a proven Swiss quality.

AIREX® commitment to tradition is aptly epitomized by more than 70 years of know-how in foam technology and long service life.

my-airex.com

My Space, My Time.

My space, my place of strength.

My space, my time to get stronger.

My space, my time to prepare for the day.

My space, my time to wind down from the day.

My space of focus and motivation.

My safe place where I heal and get better.

My safe place where I get ready for the game.

My safe place where I get ready for life.

My space for the ultimate great feeling.

The Swiss-made products that are proud of its origin, dating back to 1952.

Our products are of highest quality and guarantee a lifetime satisfaction, made for your own good for good.

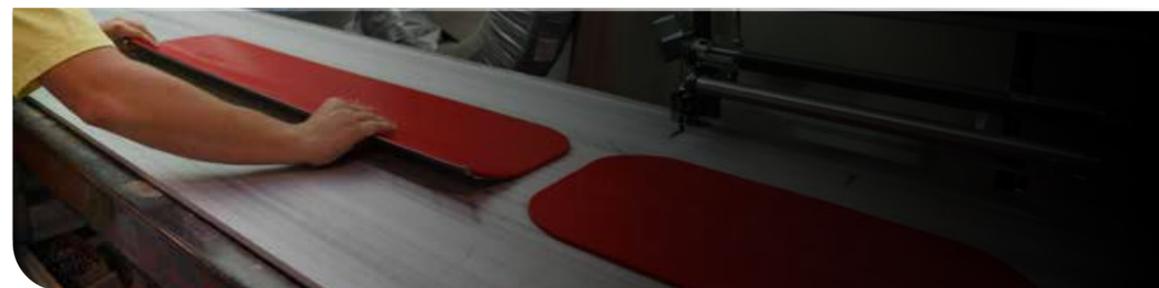

AIREX®

+ SWISS MADE
PRODUCTS

The unrivalled AIREX® products are indispensable companions in the realm of professional and safe training and therapy right from the very start of the process. The AIREX® sports accessories render any practical application more natural, effective, and comfortable.

All AIREX® products have unparalleled quality and unique selling points, visibly distinguished from other products, especially from low-priced lookalikes and knockoffs.

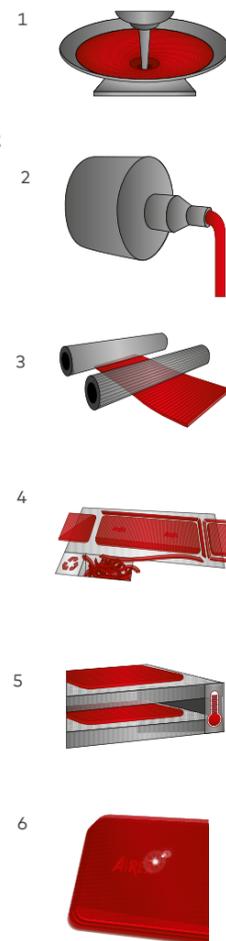

The AIREX® R&D Lab in Switzerland is fully committed to innovation and product optimization in close collaboration with world-renowned universities, clinics, sports scientists, and physicians. For decades AIREX® products have been used for successful applications in hundreds of olympic training camps and performance centers, thousands of fitness studios and clubs, as well as rehabilitation centers and physical therapy facilities all over the globe.

A globally unique production technique

All AIREX® products are 100% made in Switzerland compliant with a special manufacturing procedure. The production takes about eight exceptional hours, and could best be described if compared to a one-of-a-kind baking process:

1. The dough is made to a secret recipe in large pots and kneaded into a homogeneous mass.
2. A special process is applied to knead the dough into a solid, porous mass.
3. The mass is rolled out and molded to receive a characteristic shape and grooves.
4. Appropriately sized molded pieces are removed from molds and the remaining dough is fully recycled.
5. The mats are put in the oven to bake, where their original size increases multifold. The resulting pieces coming out of the oven are unique, which is why their masses are always indicated "approximately."
6. The finished products are left to cool, packed and prepared for sale.

Quality – Made in Switzerland

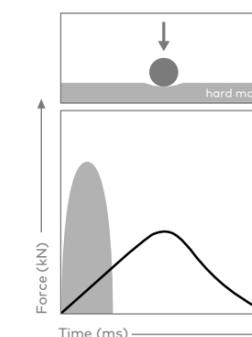

The manufacturing technology for closed cell foams developed by AIREX® – the market leader in foam technology – is one of a kind. The most stringent quality controls exercised on a regular basis demand AIREX® assurance about impeccable all-round products from the AIREX® manufacturing process, and dealers to end consumers.

As a specialist in application-specific foams, AIREX® sets high quality standards worldwide. Our products are constantly developed and enhanced. Quality assurance has a very high priority in our production and development.

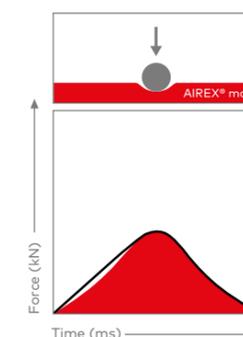

The AIREX® mats' innovative, closed-cell foam was developed over many years. The extremely durable material is supportive and warm, soft and cushioning. Joints are stabilised, tendons strengthened allowing muscles to be trained both extremely gently and efficiently.

The AIREX® mats provide optimal cushioning and support perfect training practices.

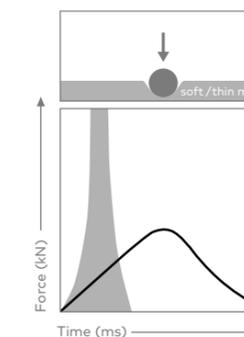

— Optimal cushioning curve
— Unfavorable cushioning curve
— AIREX® cushioning curve

Hard mat
The impacting energy is destroyed in a very short time. The cushioning is perceived as uncomfortably hard and can strain joints, tendons, and muscles in the long run.

AIREX® mats
Not too hard, not too soft. AIREX® foam can perfectly suit individual applications. The energy is softly and evenly absorbed.

Soft mat
The foam is too soft to trap the impacting energy. Hard hits are unavoidable and can cause unpleasant stress on the spine and joints.

The Swiss-made AIREX® products are comprised of up to 96% air, which makes them unique in the world. Air not only constitutes the essential component of our products, but also the most prominent feature of our brand philosophy.

+ SWISS MADE

MATS

The unique foam technology adorning our exceptional AIREX® mats sets new sports accessories standards elevating AIREX® mats to top-class high-tech products.

The extremely durable material of AIREX® mats is pleasantly soft, warm, and has perfect cushioning to protect joints, tendons, and spine.

The grooved and slip-resistant upper and lower surface provides desirable safety. The closed cell foam technology prevents any ingress of water or dirt – hygienically perfect.

SWISS BORN IN

AIREX®

1952

The Swiss-made AIREX® products are comprised of up to 96% air, which makes them unique in the world. Air not only constitutes the essential component of our products, but also the most prominent feature of our brand philosophy.

Main features:

- Ultimate comfort: insulating, soft, warm with excellent high damping properties
- Highest security: optimal stretch, flat-lying, robust, non-slip with rounded edges and 90° squared-like
- For indoor & outdoor use: weather-resistant
- Longevity
- Hygienic: Sanitized® treatment and easy to clean
- Closed cell foam structure

INTENDED PURPOSE: The AIREX® mats and balance trainers are designed as movement therapeutic aid for both institutional and domestic use. A device lying on the floor serves as a base for a person during medically indicated and prescribed exercises to improve motor skills and balance or postural control and/or for movement therapy treatment of muscle weakness in the limbs and trunk as a result of a neurological or orthopedic disease.

BALANCE PRODUCTS

The products are applicable in rehabilitation, prevention, recreational and competitive sports, as well as in-home and office training.

The AIREX® Balance product line is one of the most effective options for sensorimotor coordination training.

Minimum effort for maximum success

The one of a kind AIREX® Balance products are highly effective. AIREX® Balance-pads can be used for intelligent therapy and as exercise equipment.

The beginners and advanced users are equally in need of varied full body workouts featuring strong appeal and safe performance.

The unique AIREX® foam technology makes it all possible. It sets new sports accessories standards and elevates the Balance-pads product line to the line of top-quality high-tech products.

Function:

The AIREX® Balance-pad and beam destabilizing effect triggers the engagement of deep-seated muscles to regain balance and stability.

It prompts the neural control function, spurring a significant improvement of communication between the nerves and the muscles.

As a result, training on the Balance-pad is far more effective and involves more muscle fibers per exercise than training without a Balance-pad.

The workout with the entire AIREX® Balance-pad product line provides a tremendous joint and spine relief.

Main features:

- Ultimate comfort and training effects: insulating, soft, warm with optimal destabilizing properties
- For all kinds of therapeutic and training applications
- Physical and mental multi-functionality
- For indoor & outdoor use: weather-resistant
- Longevity
- Hygienic: Sanitized® treatment and easy to clean
- Closed cell foam structure

Sporting effect:

- Training of basic motor skills, such as strength, flexibility, endurance, coordination and balance
- Increased muscle action potential = higher efficiency
- Fascia training through "proprioceptive refilement"
- Physical and mental multi-functionality
- Concentration ability enhancement

Therapeutic effect:

- Proprioception improvement
- Spine stabilization
- Joint stabilization
- Firming of connective tissue
- Sensorimotor function improvement
- Effective regression after pregnancy
- Posture improvement
- Cardiovascular diseases, arthrosis, osteoporosis and herniated discs
- Sensorimotor Coordination Therapy

CERTIFICATES

MD

Medical Device

Each and every AIREX® mat and Balance-pad made in Switzerland are unique pieces in compliance with the Medical Device Regulation (EU) MDR 2017/745.

Superbly back-friendly

More and more people suffer from back pain. Aktion Gesunder Rücken e.V. (AGR) awards the "AGR Seal of Quality" for back-friendly everyday products, rated "very good" by the magazine "ÖKOTEST." Most AIREX® mats and Balance products have been awarded this AGR seal of approval, making them particularly back-friendly products. The products have been tested and recommended by the Forum Gesunder Rücken – besser leben e.V. [Forum Healthy Back – living better] and the Bundesverband der deutschen Rückenschulen (BdR) e.V. [Federal Association of German Back Schools].

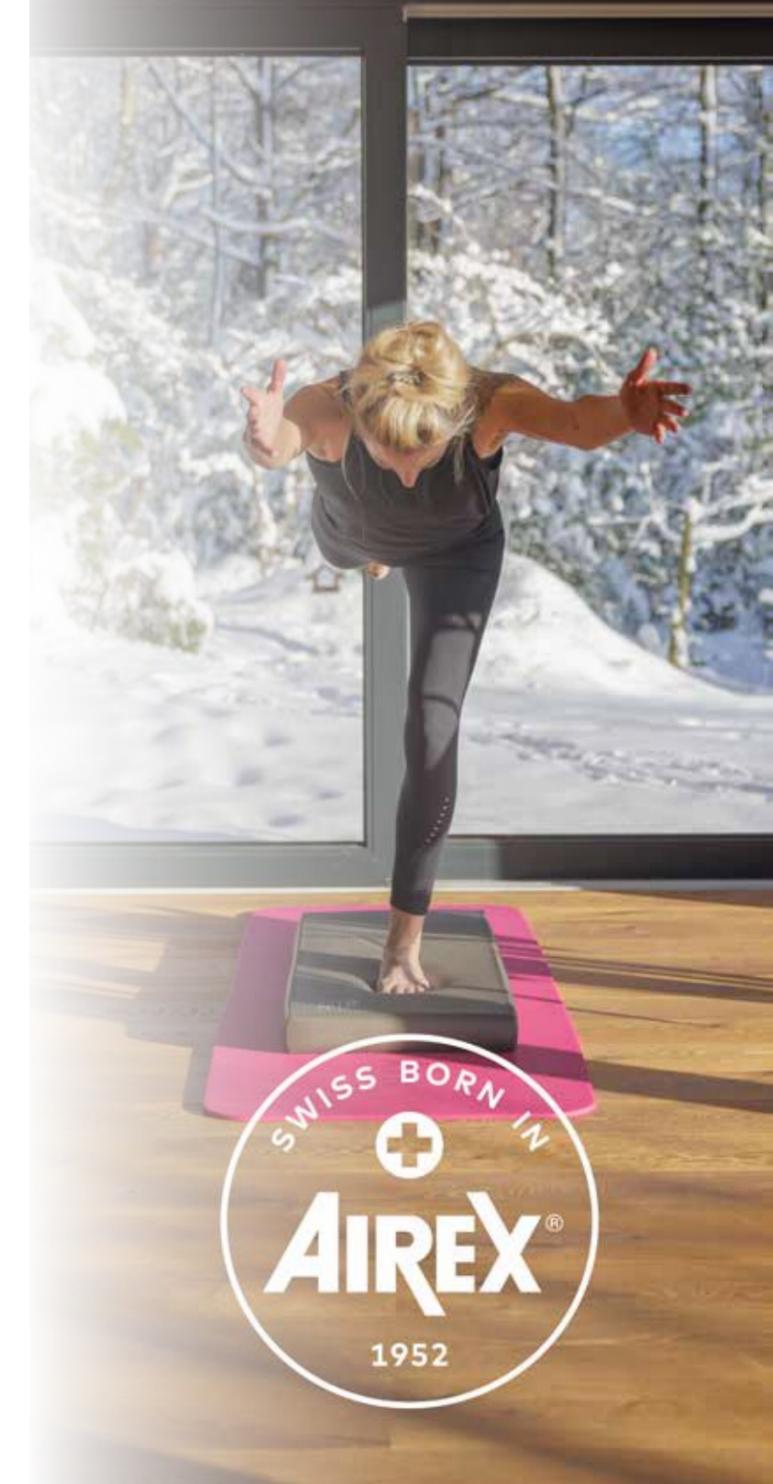

Antibacterial coating

The innovative AIREX® material meets increased hygiene requirements with the antimicrobial agent. The integrated Sanitized® hygiene function reliably and permanently protects the material against bacteria, odors, and mildew. Not only the optics, but also the material are preserved for a long time.

Responsible manufacturing

Airex AG as a manufacturer is ISO 9001, ISO 14001, and ISO 45001 certified. AIREX® products are manufactured CE and in compliance with Medical Device Regulation (EU) MDR 2017/745. All ingredients are REACH-compatible and thus comply with all current legal requirements.

FITLINE

The damp-proof quality of AIREX® Fitness & Training products protects against cold, smooth or dirty surfaces, and prevents slippage during exercises. Their unique technology relieves strain on the spine and protects the joints.

+ SWISS MADE

STUDIO

140

180

200

The AIREX® Fitline mats are the ultimate choice for sports and training, used by countless top athletes across the world. The Fitline is a classic fitness mat often used for group fitness classes in gyms. As a small, lightweight and trendy training mat, the AIREX® Fitline is also a perfect gymnastics mat at home and "on the go".

In contrast to the Fitline 180, the Fitline 200 is extra-long and extra wide. The greater length of 200 cm also allows taller users to find their way around the mat better. The width of 80 cm also helps to expand the freedom of movement.

Buying an exercise mat is an important decision because the mat should bring you every day benefits.

AIREX® Fitline Studio

Size: approx. 100 x 50 x 1 cm
Weight: approx. 0.8 kg

AIREX® Fitline 140

Size: approx. 140 x 60 x 1 cm
Weight: approx. 1.3 kg

AIREX® Fitline 180

HERITAGE

AIREX® Heritage

The AIREX® Heritage Mat symbolizes the AIREX® brand's promise in its own unique way, starting with the very first AIREX® mat produced for the Swiss Army.

This mat can be used as a multifunctional mat in different segments.

Size: approx. 190 x 60 x 0.8 cm
Weight: approx. 1.6 kg

XTR EMA

AIREX® Xtrema

The AIREX® Xtrema is a breakthrough innovation – the most robust mat in the AIREX® range. Due to its high density foam, the AIREX® Xtrema can be used outdoors on stony ground, gravel roads and the beach regardless of weather conditions. Owing to its high stiffness, the AIREX® Xtrema is equally suitable for yoga and pilates, but also for professional, functional training.

Size: approx. 178 x 58 x 0.6 cm
Weight: approx. 1.8 kg

CORONA 185 / 200

AIREX® Corona 185 / 200

The AIREX® Corona has been our most popular exercise mat for years. It delivers outstanding workout features. The AIREX® Corona fulfills all the key requirements expected from a perfect exercise mat by health professionals. No wonder that Corona has become No. #1 mat for physical therapy and personal training.

It provides enough space for all types of exercises. This mat is also used in club sports, gyms, therapeutic facilities, at home and in the office. It's suitable for outdoor use and can even be used in water.

Size: approx. 185/200 x 100 x 1.5 cm
Weight: approx. 3.9 kg / 4.3 kg

BALANCE-PADS

Minimum effort for maximum effect

The one of a kind AIREX® Balance products are highly effective.

The AIREX® Balance-pads product line is one of the most effective options for sensorimotor coordination training.

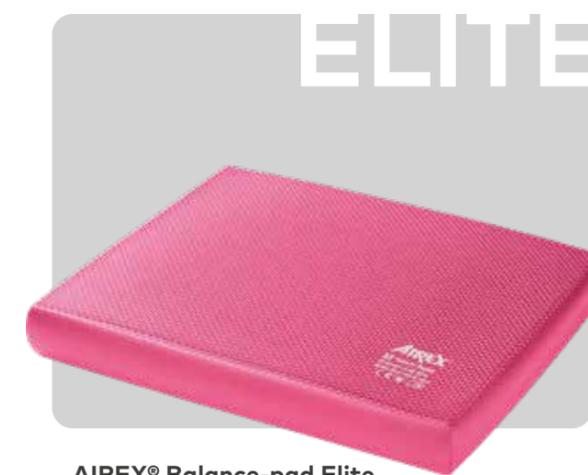

The AIREX® Balance-pad destabilizing effect triggers the engagement of deep-seated muscles to regain balance and stability. It prompts the neural control function, spurring a significant improvement of communication between the nerves and the muscles.

As a result, training on the Balance-pad is far more effective and involves more muscle fibers per exercise than training without a Balance-pad.

The workout with the entire AIREX® Balance-pad product line provides a tremendous joint and spine relief.

SWISS MADE

AIREX® Balance-pad Elite

The AIREX® Balance-pad Elite has unique slip-resistant waffle-like texture on its upper and lower side providing pleasant stimulation for receptors in the foot sole during barefoot balance training. The AIREX® Balance-pad Elite, owing to its thickness of 6 cm, has the desirable destabilizing characteristics. Its smooth surface is perfect for barefoot balance training beginners. The yielding foam constantly challenges the body to maintain its balance and stabilize the joints.

Size: approx. 48 x 40 x 6 cm
Weight: approx. 0.8 kg

AIREX® Balance-pad Cloud

The AIREX® Balance-pad Cloud generates more intense stimuli as it is far more unstable and wobbly than any other predecessor of the AIREX® Balance-pad product line. These features stem from the Cloud's lower density foam composition.

The Cloud is an advanced Balance-pad version used by athletes and users able to maintain perfect balance.

Size: approx. 48 x 40 x 6 cm
Weight: approx. 0.8 kg

AIREX® Balance-pad Mini

The AIREX® Balance-pad Mini was primarily designed to meet functional training requirements, but it is just as perfect for traveling. It is not only an active training tool, but also a good prop for training instructors. It provides a smaller training area fantastic for one-legged and single-handed functional exercises as well as for dynamic training.

Size: approx. 41 x 25 x 6 cm
Weight: approx. 0.4 kg

XL

AIREX® Balance-pad XLarge

The AIREX® Balance-pad XLarge is twice the size of the Balance-pad Elite, allowing a completely new perspective of balance training as a result. The advent of the Balance-pad XLarge inaugurated a new range of exercises and their variations making training a more challenging task. The Balance-pad XLarge, owing to its thickness of 6 cm, has the desirable destabilizing characteristics. The AIREX® Balance-pad XLarge is especially designed for office use.

Size: approx. 98 x 41 x 6 cm
Weight: approx. 1.4 kg
