FLOORING SOLUTIONS FOR PHYSIOTHERAPY

PAVIGYM

P PAVIGYM
ENDURANCE

TECHNICAL AREA. Versatile and resistant flooring for free weight and re-adaptation zones.

P PAVIGYM
PERFORMANCE

FUNCTIONAL AREA. Premium flooring with a competitive price, perfect for functional training areas with low weights.

Hard flooring surfaces such as tiles or marble can limit or slow down the recovery of patients, especially those with reduced mobility. Pavigym's rubber flooring helps prevent injury and facilitates patient progress.

Pavigym's physiotherapy solutions make it easy to perform stretches and exercises with the best technique and precision.

BENEFITS

1

Anti-slip and comfortable

Protect your customers with a floor that won't slip, even when wet. With a comfortable and pleasant texture, the rubber favours recovery.

2

Absorbs shocks and returns energy

Thanks to its Energy Return system, our Pavigym solutions cushion and return energy to the joints, absorbing shocks and preventing injuries.

3

Resistant

Our floors are durable and resistant. They do not get marks with equipment or falling weights. The best choice for a long-term investment.

4

Hygienic

Non-porous floors that prevent the appearance of bad odours. In addition, they are certified as bacteriostatic and fungicidal, thus preventing the spread of bacteria, which is indispensable for clinics.

5

Easy to install

Glue-free installation. Thanks to the interlocking system, the tiles fit together like the pieces of a puzzle.

Improve the performance and profitability of your physiotherapy clinic with a floor that is easy to clean and prevents bacterial growth.
